PROFILE

As a Frontend Developer I apply my React js skills to create responsive and user-friendly websites and landing pages. I collaborate with designers, backend developers, and project managers to deliver high-quality and scalable solutions that meet client requirements and deadlines.

I have a Bachelor of Science degree from Assiut University, where I learned the fundamentals of HTML, CSS, JavaScript, React and TypeScript, as well as object-oriented programming and problem-solving techniques. I also obtained four certifications from the Information Technology Institute (ITI) in JavaScript and HTML5 with CSS3. I am passionate about learning new technologies and frameworks, and I continuously seek opportunities to improve my skills and knowledge.

PROJECTS

Comfy Store 🔗
The Comfy Store Project aimed to develop an online e-commerce platform tailored for users seeking comfort-focused products, ranging from apparel to home essentials with darkmode

Sloth E-commerce 🔗
Sloth E-commerce is a digital platform designed for individuals seeking a laid-back and stress-free online shopping experience. Drawing inspiration from the calm and unhurried nature of sloths, the platform aims to simplify the e-commerce process while offering a curated selection of products.

Tasks app 🔗
The Tasks App is a digital platform designed to help users manage and organize their daily tasks, assignments, and to-dos efficiently, ensuring productivity and timely completion of goals

Beaches Landing page 🔗

Food landing page 🔗
